1. Process Overview

1.1 Process Name

Ticket Support Lifecycle (Multi-Channel Support System)

1.2 Trigger Event

A customer submits a support request via:

- Phone call
- Walk-in
- Email
- Chat
- Web form

1.3 Process End State

The process ends when:

- Ticket is resolved and closed
- Customer confirms resolution (or auto-close applies)
- CSAT feedback is collected

1.4 Objective

To ensure structured handling of customer issues through logging, assignment, resolution, escalation, quality assurance, and closure while maintaining SLA compliance.

1.5 Scope

Table (Word Style: Table Grid)

In Scope	Out of Scope
Ticket creation and management	Billing disputes handling
Multi-channel support	Product returns processing
Escalation workflow	HR/Training management
QA review process	System infrastructure setup
SLA monitoring	External system integrations

2. Roles & Actors

Table

Role	Responsibilities
Customer	Submits issues, confirms resolution, provides feedback
Agent	Creates, manages, and resolves tickets
Team Lead	Handles escalations and advanced troubleshooting
QA Analyst	Reviews ticket quality and provides feedback
Manager	Monitors performance and ensures SLA compliance
System	Automates assignment, notifications, and tracking

3. Swimlane Process Flow

3.1 Customer Flow

- Submits issue via any channel
 - Receives resolution notification
 - Confirms or rejects resolution
 - Provides CSAT feedback
-

3.2 Agent Flow

1. Receives customer interaction
2. Creates ticket and logs details
3. System assigns ticket automatically
4. Reviews ticket details

Decision: Can issue be resolved?

- Yes → Resolve ticket and update status
 - No → Escalate to Team Lead
-

3.3 Team Lead Flow

1. Receives escalated ticket
 2. Evaluates issue
 3. Takes action:
 - Reassign to specialist
 - Guide agent
 - Resolve directly
 4. Marks ticket resolved
-

3.4 System Flow

- Auto-assigns tickets based on workload and skills
 - Sends notifications (assignment, resolution, closure)
 - Tracks SLA timers
 - Triggers CSAT survey
-

3.5 QA Flow

- Samples 10% of resolved tickets
 - Reviews using scorecard
 - Decision:
 - Pass → Continue process
 - Fail → Coaching required
 - Sends feedback to agent & management
-

3.6 Manager Flow

- Reviews QA failures
 - Initiates coaching/performance actions
 - Monitors overall performance
-

4. Decision Gateways

ID	Decision	Yes Path	No Path
D1	Can agent resolve?	Resolve ticket	Escalate
D2	Team Lead decision	Reassign/Resolve	—
D3	QA Pass?	Close process	Coaching
D4	Customer accepts?	Close ticket	Reopen

5. Exception Handling

Case	Action
No agent available	Queue ticket
Duplicate ticket	Merge suggestion
SLA breach	Escalate to Manager
No customer response (7 days)	Auto-close
QA repeated failure	Performance plan
Abusive customer	Escalate to Team Lead

6. Business Rules

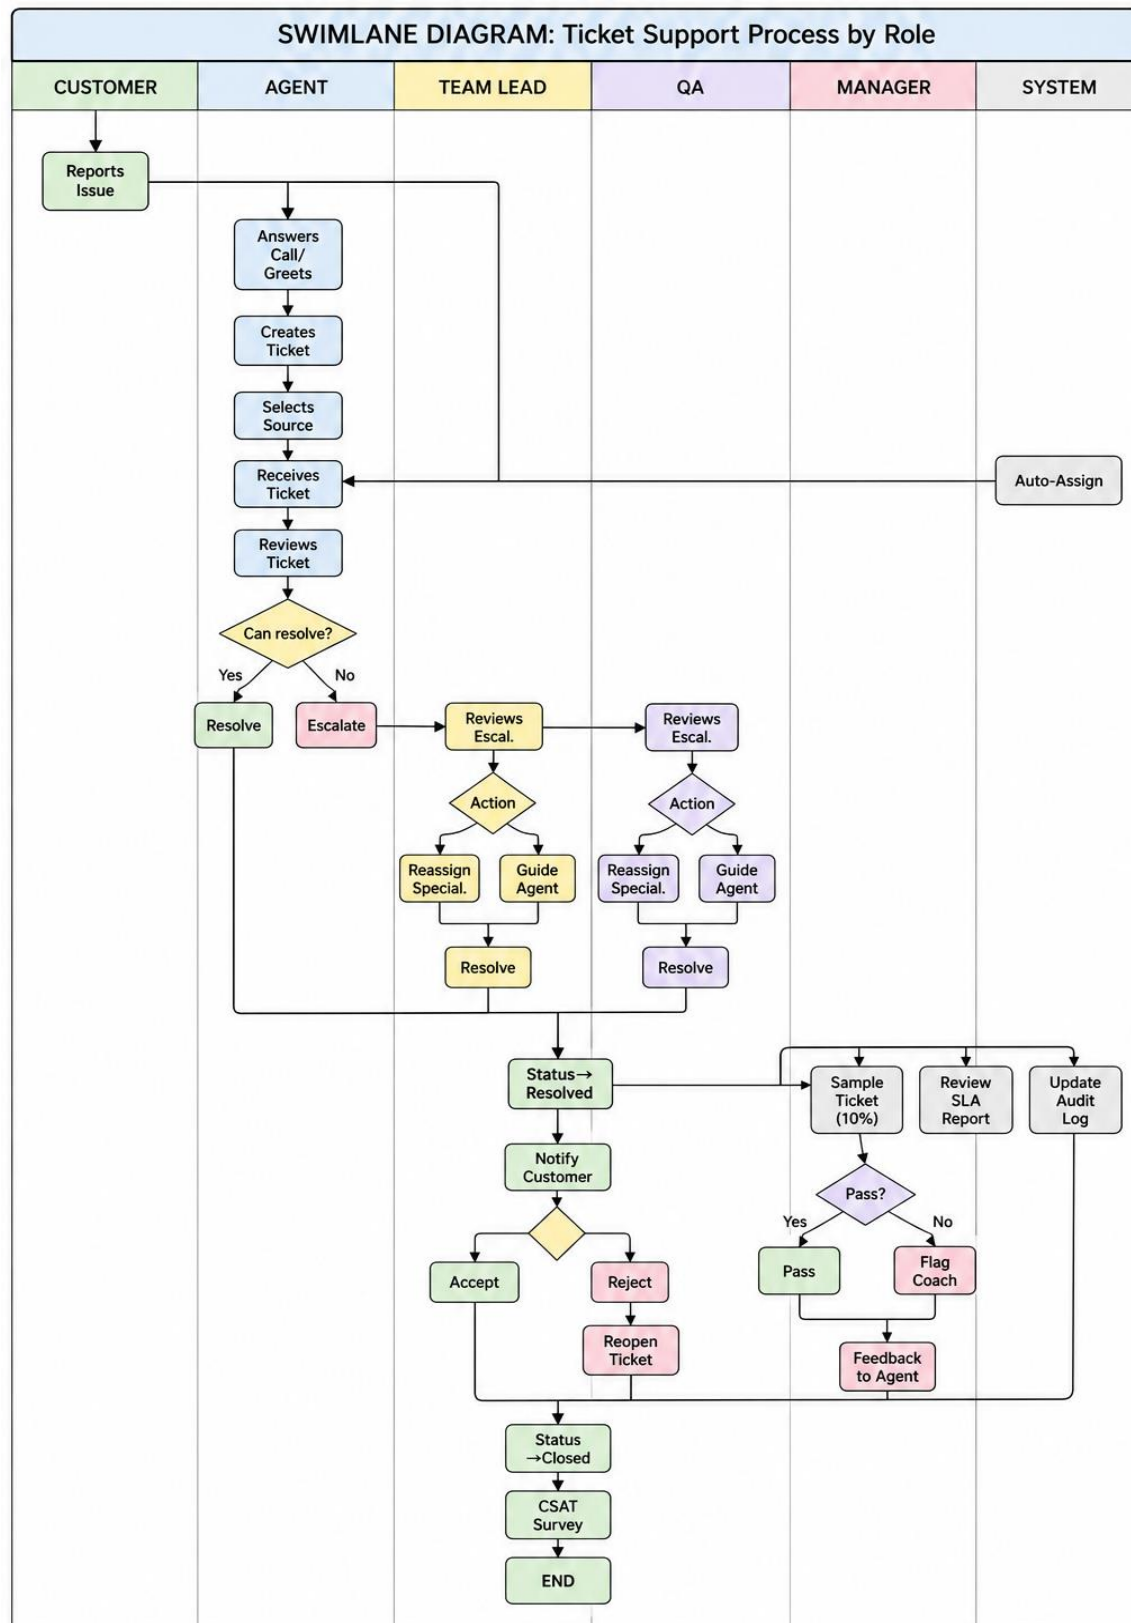

- Tickets created immediately after interaction
 - Auto-assignment based on workload
 - Priority 1 → Senior agents
 - QA samples = 10%
 - QA pass $\geq 4.0/5.0$
 - Tickets reopen within 7 days
 - CSAT only after closure
 - SLA applies to all active tickets
-

7. KPIs & Metrics

KPI	Description	Target
First Response Time	Time to first response	< 1 hour (P1)
Resolution Time	Time to resolve	< 4 hours (P1)
Escalation Rate	% escalated tickets	< 25%
QA Pass Rate	Quality score compliance	> 80%
Reopen Rate	Reopened tickets	< 5%
CSAT Score	Customer satisfaction	$\geq 4.5/5$

KPI	Description	Target
SLA Compliance	On-time resolution	> 98%

8. Process Summary Flow (Insert as Diagram in Word)

9. Approval & Governance

Role	Name	Signature	Date
Business Analyst			
Support Manager			
QA Lead			
Product Owner			

10. Revision History
